

# Appling County UGA Extension Grower Services

## Drone Imagery

Utilizing drone for aerial imagery

## Planter Insecticide Hoppers Calibration

At-plant insecticide hopper box calibrations. Potential benefits: increase insecticide application efficacy with the appropriate and effective application of product label and recommended control rate.

## Grain Moisture Testing

Corn and soybean moisture testing to decrease drying time and fuel costs.

## Hay Moisture Tester

Evaluation and assessment of hay to bale at optimum moisture content – decrease mold growth and increase feed value. Test baled or unbaled (in field)

## Mobile Irrigation Lab

Pivot efficiency evaluation/Irrigation audits to support water conservation.

## Runoff Mitigation Calculator

A tool to assist producers with calculating mitigation points to ensure producers that they are meeting the EPA's ESA herbicide strategy regulations.

## SpotOn Digital Sprayer Calibrator & nozzle cleaner tool:

Accurate flow rate checking of individual sprayer nozzles.

## Troubleshooting/Scouting
