

GA CNMP Generator Software

Installation Instructions

Requirements:

1. Windows 98 or newer operating system.
2. Microsoft Word version 97 or Newer

Installation:

1. To install, click on the link above. You should be able to install directly (run) or you can save to your local computer and install from there.
2. When you begin installation, you will probably get a message saying that this software is from an unknown publisher. Do you still want to install it? Click Yes
3. When installation starts, click Next to accept default locations for the installation or you can alter these locations if you wish. On the third screen, you will have a choice of creating a Desktop icon and/or a Quick launch icon. You can choose either, both, or neither. (The Quick launch bar is the bar at the bottom of your screen from which you can quickly launch applications that you use frequently.
4. You will then come to the installation screen, where you will click Install. The program will install and then ask you if you want to run the Visual Basic 6.0 Installation files. You will need to click Yes one time. If you have previously installed either this software or the software for one of the other species, you do not need to run it again. It will not do any harm, however, to run this again.
5. Click on Finish and the installation is complete. If you installed a desktop or quick launch icon, you can start the program from there. If you did not install an icon, click on Start, All Programs, CNMP and then the Version of CNMP you want to start. Note that on this Program menu, there is also an Uninstall option that can be used to uninstall the software.
