## Invasive Species BMPs

**Inspect and manage now to reduce  
invasive populations later!**

Winter is a good  
time to manage for  
certain invasives.

Inspect outdoor  
items for invasive  
insect egg masses  
and plant seed/fruit.

Remove them now  
to reduce growing  
season populations.

## Keep Invasives and Pests Out!

### Outdoor Household Vectors and Pathways

Invasive species can spread via outdoor toys, furniture, equipment,  
etc. and can spread when moved, sold, or thrown away.

#### Outdoor Rubbish

#### Outdoor Equipment

#### Outdoor Furniture

### Prevention Methods

- ✓ Know how to identify invasive species' egg masses and seeds in your area.
- ✓ Inspect outdoor structures, furniture, etc. regularly.
- ✓ Inspect items before donation, selling, or disposal.
- ✓ Inspect outdoor items before bringing them onto your property.
