

LET'S GET CERTIFIED TO COMBAT AQUATIC NUISANCE SPECIES

Aquatic Nuisance Species (ANS) have affected or have the potential to negatively impact Georgia native species. Though some of these introductions are the result of range expansions or climatic events (e.g., hurricanes, etc.), most are the result of human activities. ***YOU can make a difference and protect Georgia waters!***

The Georgia Department of Natural Resources' Wildlife Resources Division has created a voluntary ANS Certification Course that you can complete at home in about 5 minutes.

COMPLETE THE TRAINING, TAKE THE TEST, GET CERTIFIED AND RECEIVE REWARDS!
