

2017 Colquitt County Extension Cotton Fungicide Demonstration

Treatment	Turnout	Lint Yield Per Acre
Treated	0.39	1212.83
Untreated	0.39	1208.82

Demonstration was replicated three times. Elatus was applied at 7 oz per acre and application window was the third week of bloom. Fungicide was applied a highboy sprayer. Plots were 18 rows wide and plot length ranged from 1188 to 1314 feet long. Middle 8 rows were harvested with a four row basket picker and weighed with an industry weigh wagon. DP 1646 was planted with a 40 inch row planter. Seed cotton samples were taken and sent to UGA Microgin. Special thanks to Glenn Chafin for help with demonstration.
