¹Days After Planting.

- Notes:
- Use higher rate of **UMBRA** if white mold risk increases to High Risk category.
 - **UMBRA** controls soil-borne diseases (*Sclerotium rolfsii* – white mold/Southern blight; *Rhizoctonia solani* – limb rot) and foliar diseases (early and late leaf spot; peanut rust; web blotch).
 - One pint of chlorothalonil (or 5 pounds of Microthiol Disperss, where noted) should be used with all applications of **UMBRA** to reduce risk of resistance and to enhance leaf spot control.
