

The Warnell Continuing Education Program

Daniel B. Warnell School of Forestry and Natural Resources

Longleaf Pine Establishment and Management

Instructors: Drs. David Dickens and David Clabo,

Bulloch County Ag Center—Conference Room

151 Langston Chapel Rd, Statesboro, GA

October 11-12, 2022

WARNELL
SCHOOL OF FORESTRY AND NATURAL RESOURCES
THE UNIVERSITY OF GEORGIA

Purpose

Approximately 19,043 acres of longleaf pine were planted in Georgia in 2019 alone. Longleaf pine's silvical characteristics, fire adaptations, and tolerance of low fertility sites once made it the dominant pine species on over 90 million acres across the southeastern U.S. Major restoration efforts have been occurring across longleaf pine's native range during recent decades. The purpose of this workshop is to provide information on several aspects of longleaf pine management. This workshop will address the various aspects of establishing longleaf pine including: site preparation (mechanical and chemical), seed source selection, seedling quality, planting, the planting phase (timing and planting depth), and post-plant herbaceous weed control. Additional topics will include pine straw raking, fertilization, and prescribed burning. We will also address estimated longleaf pine growth rates on old-field sites through stand age 32 years, and provide in depth results from a large seed source study. Course participants should leave the course with improved knowledge on how to effectively establish and manage longleaf pine stands with an emphasis on seedling survival and reasonable stand growth.

Participants will:

- Learn about longleaf pine establishment factors and ways to maximize survival and early growth.
- Review cut-over and old-field pine wood and pine straw studies
- Learn how the effects of various herbicides and application timings effect longleaf pine survival and growth.
- Learn about prescribed fire and its impacts on longleaf pine survival and growth.
- Learn about the survival and growth performance of several longleaf pine seed sources planted at six locations in Georgia.
- Learn about the effects of fertilization on wood growth and pine straw yields on cut-over and old-field sites
- Discuss the economics of growing longleaf pine on old-field and low fertility cut-over sites

How One Will Benefit

Upon completion of this course, a forest landowner or land manager will be able to make effective silvicultural and economical management decisions on managing longleaf stands with an emphasis on early survival and growth.

Who Should Attend?

Foresters, land managers, forest landowners, pine straw contractors, and others interested in effectively managing their pine stand for pine straw.

Instructors

Dr. David Dickens – Professor of Forest Productivity UGA-WSF&NR

Dr. David Clabo – Assistant Professor of Silviculture UGA-WSF&NR

Registration Fee

The fee for this course is \$275 which includes webinar access and copies of the presentations. There is a \$50 discount for fees paid and postmarked by 30 September 2022. We need a minimum of 15 participants by 30 September 2022 to conduct the workshop.

Continuing Education Credits (approved)

- 11 hrs Continuing Forestry Education (CFE) hours- Category 1 (applied for)
- 11 hrs Continuing Logger Education hours - Category B (applied for)
- 1 hr Cat 23 1 hr Cat 10 Pesticide Applicator credits for GA (applied for)

Full Attendance is Mandatory to Receive Credit

Day One: Tuesday, October 11, 2022

Time	Event
8:50 a.m.	Welcome—Clabo / Dickens
9:00	The establishment phase-preparing the site—Dickens
10:00	Longleaf genetics and seedlings; size, quality, bareroot vs containerized, handling—Clabo
11:00	Management implications for longleaf pine on old-field sites—Clabo
12:00	Lunch
1:00	Post-plant herbaceous weed control—products, timings, dosages, and study results—Dickens
2:00	Prescribed burning; timing, frequency, effects on survival and growth—Clabo
2:15	Longleaf pine seed source study-5-8 year results—Clabo
3:00	Break
3:15	Economics of growing longleaf pine—Dickens
4:15	Questions and Adjourn

Day Two: Wednesday, October 12, 2022

Time	Event
8:15 a.m.	Longleaf pine growth rate estimates through age 32 on two old-field sites—Dickens
9:15	Pine straw raking basics—Clabo
10:00	Maintaining pine straw production and wood growth of longleaf pine on cutover and old-field sites—Dickens
10:45	Break
11:00	Depart to longleaf study areas—Oliver, GA
11:40	Discussion in a twice thinned longleaf pine stand (planted December 1986) where pine straw management occurred and midrotation fertilization trials were conducted.
	Longleaf pine seed source study: survival, growth, stem form, and management history impacts on results
1:40 pm	Questions, Evaluations and Adjourn
