HOW TO SELECT A BENERALE AND A TO TO THE SITY OF EXTENSION

IN THE FIELD: WHAT TO LOOK FOR

CHECK THE TENDRIL

A brown, dried tendril near the melon indicates it is mature.

INSPECT THE GROUND SPOT

A ripe melon will have a bright yellow spot, pale or white means its less mature.

THUMP IT

A hollow sound indicates ripeness, while an immature melon will have a higher-pitched sound.

EXAMINE THE RIND APPEARANCE

Striped melons should have green bands that break up at the blossom end.

AT THE GROCERY STORE

Published by University of Georgia Cooperative Extension. For more information or guidance, contact your local Extension office. The University of Georgia College of Agricultural and Environmental Sciences (working cooperatively with Fort Valley State University, the U.S. Department of Agriculture, and the counties of Georgia) offers its educational programs, assistance, and materials to all people without regard to age, color, disability, genetic information, national origin, race, religion, sex, or veteran status,

and is an Equal Opportunity Institution.
