

# GREEN ONIONS

## WHEN TO HARVEST

1

Green onions can be harvested at different times depending on your desired flavor.

2

Once the green leaves have grown to the length of a pencil they can be harvested.

3

For a stronger flavor, wait to harvest until the greens are 8-12 inches long.

## HOW TO HARVEST

1

Gently loosen the soil around the plant with your fingers.

2

Carefully pull out the entire plant (green leaves and white root).

## STORAGE

Carefully slice the roots and the tip of the white stem off of the green onions. Wash and store them in the fridge.
