

R A D I S H

WHEN TO HARVEST

1

Radishes are ready to harvest once they have grown to 1 inch in diameter.

2

Radishes are best harvested when they are young.

3

You can check if your radishes are ready by pulling one from the soil and checking its size.

HOW TO HARVEST

1

Gently pull the radish from the soil at the base of the greens.

2

If the soil is crusted and hard, use a garden trowels to gently lift the root from the soil.

STORAGE

Cut the green tops and the roots from each radish and wash them. Store them in cold conditions. They can last up to one month.
