

Focusing on Important Necessities in your Dwelling

FIND METHODS

Declutter your life with these tips and tricks!

1. REDUCE-RECYCLE-REUSE

Reduce - Practice purchasing less

Recycle - Composting is a great way!

Reuse - Shoe boxes as gift boxes or used paper for notes

2. "SHOP LOCAL"

Shop your own home first! Often we don't know what we own because things are hidden away or stashed.

3. ENTERPRISE

One person's junk is another's treasure. Apps make it a breeze to turn everything from household items to clothing into "green."

4. "MOVE"

Each time we move, we realize what we need and what we don't as it forces us to minimize and box up things. Do a mock move.

5. DONATE

Give to those who need what you no longer use. You'll feel good knowing you helped others, and you might get tax incentives.
